## What does REACH Upholstery Nester do?

A significant part of the cost of Upholstery products is material cost.

In a competitive Upholstery market, the ability to provide Upholstery at prices attractive to customers while protecting margins for the firm is critical to survive, grow and thrive.

A lot of material is wasted in Upholstery manufacture, as the optimal packing of patterns involves very, many permutations and combinations. This would be a challenging task even for a highly skilled pattern lay planner.

REACH Upholstery Nester leverages new generation, powerful Artificial Intelligence (AI) tools to create optimal layouts of patterns saving significant quantities of material.

REACH Upholstery Nester will enable you create an effective material cost management system.
